1. Introduction to Bankline import

1.1 What is Bankline import?

Bankline allows your business to manage everyday banking over the internet, including the ability to make domestic and international payments. Bankline import extends the current payment functionality to enable you to import your payment instructions from a file, rather than manually keying them in.

Bankline supports the import of:

- standard domestic payments (both one off and from an existing Bankline payment template)
- urgent domestic payments (both one off and from an existing Bankline payment template)
- international payments (both one off and from an existing Bankline payment template)
- sterling and currency Inter Account Transfers (both one off and from an existing Bankline payment template)
- templates for all of the above payment types
- standard domestic bulk payments (from an existing Bankline bulk list only)
- standard domestic bulk lists
- Ad Hoc standard domestic bulk payments
- sterling bulk Inter Account Transfers (from an existing Bankline bulk list only)
- sterling Inter Account Transfer bulk lists

This user guide explains how to structure an import record for all of the supported payment types, as well as some pointers to help you get the most out of Bankline import.

1.2 How do I structure a Bankline import file?

The records in an import file must be in a Comma Separated Value (CSV) text file format.

A preceding comma before the first field is not required to define the start of the import record, and likewise a trailing comma is not required after the final field to define the end of the import record.

Each record type has its own requirements on how it should be structured. These individual requirements are set out in the import data table.

1.3 Can I import more than one record in a single file?

Multiple records can be imported in a single import file, although there are some restrictions on the possible combinations:

- templates cannot be mixed in a file with anything other than other templates
- payments from a template must reference an existing Bankline template
- bulk lists cannot be mixed in a file with anything other than other bulk lists
- bulk payments/IATs must reference an existing Bankline bulk list (excepting the Ad Hoc type)
- there can only be one bulk payment/IAT in any one file (i.e. a single debit and one or more credits)

2. Import data table – guidance notes

2.1 General

Unless specified, if a field is populated with a valid value it does not need to be padded (with leading or trailing spaces) to reach the full character length for the field.

Some fields in the import data table are shown as being not applicable for any of the import records. This is deliberate, with these fields having been reserved for future use.

2.2 Notation

We have used the following notations throughout the import data tables.

| Scenario | Notation |
|---|--|
| When defining the size of a field – | <ul style="list-style-type: none"> • 'a' denotes that the field is alphabetic • 'n' denotes that the field is numeric • 'x' denotes that the field is alphanumeric |
| When defining the validity of a field – | <ul style="list-style-type: none"> • 'M' denotes that the field is mandatory • 'O' denotes that the field is optional • 'C' denotes that the field is conditional |
| When defining the payment type – | <ul style="list-style-type: none"> • 'Std' denotes a standard domestic payment • 'Urg' denotes an urgent domestic (CHAPS) payment • 'IAT' denotes an Inter Account Transfer • 'Intl' denotes an international payment • 'DR' denotes a bulk list/payment debit • 'CR' denotes a bulk list/payment credit |

2.3 Character sets

For standard domestic (including bulk list/payment) and sterling Inter Account Transfer payment types, any free format fields are limited to the following character set.

| | | | | | | | | | | | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| A | B | C | D | E | F | G | H | I | J | K | L | M | N | O | P | Q | R | S | T | U | V | W | X | Y | Z |
| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | . | - | / | & | | | | | | | | | | | | |

For urgent domestic, currency Inter Account Transfer and international payment types, any free format fields are limited to the following character set.

| | | | | | | | | | | | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| A | B | C | D | E | F | G | H | I | J | K | L | M | N | O | P | Q | R | S | T | U | V | W | X | Y | Z |
| a | b | c | d | e | f | g | h | i | j | k | l | m | n | o | p | q | r | s | t | u | v | w | x | y | z |
| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | . | - | / | ? | : | (|) | , | + | ' | | | | | | |

The last character (blank box) in both character sets is a space.

2.4 Debit account and charge account format

These account formatting rules apply to the debit account (as represented by the Debit Account Identifier in field T010) and the debit charges account (as represented by the Debit Charges Account Identifier in field T011).

| Payment type | Formatting rules |
|--|---|
| Standard Domestic Payments Urgent Domestic Payments Standard Domestic Bulk Payments Bulk Inter Account Transfers (IATs) Ad Hoc Bulk Payments | For these payment types the debit account must be a UK Sterling account. The sort code and account number should be populated in field T010 in the format '6n8n' i.e. a six digit sort code followed by an eight digit account number. |
| Inter Account Transfers | For Sterling Inter Account Transfers the debit account must be a UK Sterling account. The sort code and account number should be populated in field T010 in the format '6n8n'. For currency Inter Account Transfers the debit account may be either a UK Sterling account or an Ulster Bank currency account. The sort code and account number should be populated in field T010 in the format '6n8n'. |
| International Payments | For this payment type the debit account may either be a UK Sterling account or an Ulster Bank currency account. The sort code and account number must be populated in field T010 in the format '6n8n' (BBAN format) or else IBAN format. The debit charges account may be either a UK Sterling account or an Ulster Bank currency account, and is populated in field T011 in the format '6n8n'. |

2.5 Credit account format

These account formatting rules apply to the credit account (as represented by a combination of the Account With Bank Identifier in field T022 and the Beneficiary Account Number in field T028).

| Payment type | Formatting rules |
|--|---|
| Standard Domestic Payments Urgent Domestic Payments Standard Domestic Bulk Payments Bulk Inter Account Transfers (IATs) Ad Hoc Bulk Payments | For these payment types the credit account must be a UK Sterling account. The sort code should be populated in field T022 (in the format '6n') and the account number should be populated in field T028 (in the format '8n'). |
| Inter Account Transfers | <p>For Sterling Inter Account Transfers the credit account must be a UK Sterling account. The sort code should be populated in field T022 (in the format '6n') and the account number in field T028 (in the format '8n').</p> <p>For currency Inter Account Transfers the credit account may either be a UK Sterling account or an Ulster Bank currency account. The sort code should be populated in field T022 (in the format '6n') and the account number should be populated in field T028 (in the format '8n').</p> |
| International Payments | <p>For this payment type the credit account will most commonly be a non UK account, but may also be a UK Sterling or UK currency account.</p> <p>In general it is recommended that wherever possible a BIC be populated in field T022 with a corresponding IBAN in field T028, both in a format appropriate for the Destination Country (field T007). SWIFT BICs are 11 characters long – for example ULSBGB2BXXX</p> <p>This is especially true for payments to Europe or other countries that support the use of IBANs, where failure to adhere to this format may impact delivery timescales and increase payment charges. However, alternative options are available for specifying the credit account.</p> <ul style="list-style-type: none"> • For a UK currency account or a non UK account an NCC may be populated in field T022 and an account number populated in field T028, both in a format appropriate for the Destination Country (T008). • If the payment routes as SEPA (see Glossary of terms) then BIC in T022 is optional and, if omitted, BIC will be derived from the IBAN in T028. |

2.6 Codewords

These rules apply to Additional Codewords (fields T048, T050, through to T066) and Additional Codewords Text (fields T049, T051, through to T067).

Additional Codewords should only be used where strictly necessary, as their use can delay the payment, prevent SEPA routing where available, and increase payment charges. Furthermore, where a codeword requires an action by the receiving bank, the codeword should only be used if the receiving bank has agreed in advance that they will act on the codeword in question.

Finally, certain combinations of codewords are not permitted. For further information on usage of codewords please refer to the SWIFT handbook.

| Codeword | Definition | Additional text |
|----------|--|-----------------|
| CHQB | Pay Beneficiary by cheque <i>This codeword may only be used by Shipping Customers, and when used the Beneficiary Account Number (field T028) must not be populated.</i> | – |
| CORT | Settlement of a trade e.g. FX deal or securities transaction | – |
| HOLD | Pay on Identification <i>This codeword may only be used by Shipping Customers.</i> | Optional |
| INTC | Intra-company payment | – |
| REPA | Related e-Payments reference | Optional |
| SDVA | Execute with Same Day Value | – |
| PHOB | Advise Beneficiary by phone | Optional |
| TELB | Advise Beneficiary by most efficient means | Optional |
| PHON | Advise Account With Institution by phone | Optional |
| TELE | Advise Account With Institution by most efficient means | Optional |
| PHOI | Advise Intermediary Institution by phone <i>When used the Intermediary Bank Identifier (field T043) must be populated.</i> | Optional |
| TELI | Advise Intermediary Institution by most efficient means <i>When used the Intermediary Bank Identifier (field T043) must be populated.</i> | Optional |

4. Examples

4.1 Introduction

These examples demonstrate how to structure and populate an import record, for a selection of payment types.

- Standard domestic payment
- Standard domestic payment template
- Standard domestic payment from a template
- International payment
- Standard domestic bulk list
- Standard domestic bulk payment
- Inter Account Transfer (IAT) bulk list
- Bulk Inter Account Transfer (IAT)

4.2 Standard domestic payment

This example shows how to format an import record for a standard domestic payment.

```

,01,,,,,,,,,98100031806542,,,,,166.42,,01102006,,,,,981000,,,,,44298801,,MR JOHN SMITH,,,,INVOICE 1234,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
    
```

This can be broken down to illustrate how each field tag on the import record has been populated.

| Field | Value | Field | Value | Field | Value | Field | Value | Field | Value | Field | Value |
|-------|----------------|-------|----------|-------|---------------|-------|-------|-------|-------|-------|-------|
| H001 | | T013 | | T028 | 44298801 | T043 | | T058 | | T073 | |
| H002 | | T014 | 166.42 | T029 | | T044 | | T059 | | T074 | |
| H003 | | T015 | | T030 | MR JOHN SMITH | T045 | | T060 | | T075 | |
| T001 | 01 | T016 | 01102006 | T031 | | T046 | | T061 | | T076 | |
| T002 | | T017 | | T032 | | T047 | | T062 | | T077 | |
| T003 | | T018 | | T033 | | T048 | | T063 | | T078 | |
| T004 | | T019 | | T034 | INVOICE 1234 | T049 | | T064 | | T079 | |
| T005 | | T020 | | T035 | | T050 | | T065 | | T080 | |
| T006 | | T021 | | T036 | | T051 | | T066 | | T081 | |
| T007 | | T022 | 981000 | T037 | | T052 | | T067 | | T082 | |
| T008 | | T023 | | T038 | | T053 | | T068 | | | |
| T009 | | T024 | | T039 | | T054 | | T069 | | | |
| T010 | 98100031806542 | T025 | | T040 | | T055 | | T070 | | | |
| T011 | | T026 | | T041 | | T056 | | T071 | | | |
| T012 | | T027 | | T042 | | T057 | | T072 | | | |

- T001 (Record Type) – The value '01' identifies a standard domestic payment. If field T003 (Template Reference) had also been populated then this would have become a standard domestic payment from an existing standard domestic payment template.
- T010 (Debit Account Identifier) – The value '98100031806542' is a UK Sterling account with sort code 98-10-00 and account number 31806542. No dashes or spaces are required when quoting the sort code, and no spaces are required between the sort code and the account number. The debit account must be a valid account as registered to that customer in Bankline.
- T014 (Payment Amount) – No leading spaces are required when quoting the payment amount, and the decimal point is necessary only where the payment amount requires it. For a standard domestic payment field T013 (Payment Currency) need not be completed as the ISO currency code GBP will be automatically associated with the payment amount in field T014.
- T016 (Date Payment to Arrive/Credit Date) – The value '01102006' equates to the 1st of October 2006.
- T022 (Account With Bank Identifier) – The value '981000' is the UK Sterling sort code 98-10-00. As detailed above in field T001 this import record is in respect of a standard domestic payment, therefore the Account With Bank Identifier must be a valid sort code for the receipt of standard domestic payments.
- T028 (Beneficiary Account Number) – This is the Beneficiary Account Number held at the Account With Bank Identifier quoted in field T022.
- T030 (Beneficiary Name & Address Line number 1) – This is the name of the beneficiary customer linked to the Beneficiary Account Number quoted in field T028. For a standard domestic payment only the beneficiary name requires to be quoted, but for other payment types the beneficiary address may also be quoted.
- T034 (Beneficiary Reference) – This is the reference that will be advised to the beneficiary customer and as such should be meaningful to the beneficiary, such as an invoice number.

4.3 Standard domestic payment template

This example shows how to format an import record for a new Bankline standard domestic payment template.

```

,,01,T,STANDARD TEMP 01,,,,,,,,98100031806542,,GBP,,,,,,,,981000,,,,,59984654,,MR JOHN SMITH,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
    
```

This can be broken down to illustrate how each field tag on the import record has been populated.

| Field | Value | Field | Value | Field | Value | Field | Value | Field | Value | Field | Value |
|-------|------------------|-------|--------|-------|---------------|-------|-------|-------|-------|-------|-------|
| H001 | | T013 | GBP | T028 | 59984654 | T043 | | T058 | | T073 | |
| H002 | | T014 | | T029 | | T044 | | T059 | | T074 | |
| H003 | | T015 | | T030 | MR JOHN SMITH | T045 | | T060 | | T075 | |
| T001 | 01 | T016 | | T031 | | T046 | | T061 | | T076 | |
| T002 | T | T017 | | T032 | | T047 | | T062 | | T077 | |
| T003 | STANDARD TEMP 01 | T018 | | T033 | | T048 | | T063 | | T078 | |
| T004 | | T019 | | T034 | | T049 | | T064 | | T079 | |
| T005 | | T020 | | T035 | | T050 | | T065 | | T080 | |
| T006 | | T021 | | T036 | | T051 | | T066 | | T081 | |
| T007 | | T022 | 981000 | T037 | | T052 | | T067 | | T082 | |
| T008 | | T023 | | T038 | | T053 | | T068 | | | |
| T009 | | T024 | | T039 | | T054 | | T069 | | | |
| T010 | 98100031806542 | T025 | | T040 | | T055 | | T070 | | | |
| T011 | | T026 | | T041 | | T056 | | T071 | | | |
| T012 | | T027 | | T042 | | T057 | | T072 | | | |

- T001 (Record Type) and T002 (Template Indicator) – The value '01' in field T001 identifies the standard domestic payment type, and the value 'T' in field T002 identifies that this is a new standard domestic payment template.
- T003 (Template Reference) – The value 'STANDARD TEMP 01' is how the template will be known in Bankline.
- T010 (Debit Account Identifier) – The value '98100031806542' is a UK Sterling account with sort code 98-10-00 and account number 31806542. No dashes or spaces are required when quoting the sort code, and no spaces are required between the sort code and the account number. The debit account must be a valid account as registered to that customer in Bankline.
- T013 (Payment Currency) – This will always be 'GBP' for a standard domestic payment template.
- T022 (Account with Bank Identifier) – The value '981000' is the UK Sterling sort code 98-10-00. As detailed above in field T001 this import record is in respect of the standard domestic payment type, therefore the Account With Bank Identifier must be a valid sort code for the receipt of standard domestic payments.
- T028 (Beneficiary Account Number) – This is the Beneficiary Account Number held at the Account With Bank Identifier quoted in field T022.
- T030 (Beneficiary Name & Address Line number 1) – This is the name of the beneficiary customer linked to the Beneficiary Account Number quoted in field T028. For a standard domestic payment only the beneficiary name requires to be quoted, but for other payment types the beneficiary address may also be quoted.

- T001 (Record Type) and T003 (Template Reference) – The value '01' in field T001 identifies the standard domestic payment type, and the value 'STANDARD TEMP 01' in field T003 identifies that it is a standard domestic payment from an existing standard domestic payment template (of that name).
- T010 (Debit Account Identifier) – The value '98100031806542' is a UK Sterling account with sort code 98-10-00 and account number 31806542. No dashes or spaces are required when quoting the sort code, and no spaces are required between the sort code and the account number. The debit account must be a valid account as registered to that customer in Bankline.
- T013 (Payment Currency) – This will always be 'GBP' for a standard domestic payment from a template.
- T014 (Payment Amount) – No leading spaces are required when quoting the payment amount and the decimal point is necessary only where the payment amount requires it. The payment amount is in the currency quoted in field T013.
- T016 (Date Payment to Arrive/Credit Date) – The value '01102006' equates to the 1st of October 2006.

4.5 International payment

This example shows how to format an import record for an international payment.

```

,,,04,,,,,US,N,,98100031806542,,,USD,1266.42,01102006,,,,,,IRVTUS3NIRD,,,,,44298801,,MR JOHN SMITH,,,,,L090630123456,1.87,,,,,USD,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
    
```

This can be broken down to illustrate how each field tag on the import record has been populated.

| Field | Value | Field | Value | Field | Value | Field | Value | Field | Value | Field | Value |
|-------|----------------|-------|-------------|-------|---------------|-------|-------|-------|-------|-------|-------|
| H001 | | T013 | USD | T028 | 44298801 | T043 | | T058 | | T073 | |
| H002 | | T014 | 1266.42 | T029 | | T044 | | T059 | | T074 | |
| H003 | | T015 | 01102006 | T030 | MR JOHN SMITH | T045 | | T060 | | T075 | |
| T001 | 04 | T016 | | T031 | | T046 | | T061 | | T076 | |
| T002 | | T017 | | T032 | | T047 | | T062 | | T077 | |
| T003 | | T018 | | T033 | | T048 | | T063 | | T078 | |
| T004 | | T019 | | T034 | | T049 | | T064 | | T079 | |
| T005 | | T020 | | T035 | L090630123456 | T050 | | T065 | | T080 | |
| T006 | | T021 | | T036 | 1.87 | T051 | | T066 | | T081 | |
| T007 | US | T022 | IRVTUS3NIRD | T037 | | T052 | | T067 | | T082 | |
| T008 | N | T023 | | T038 | | T053 | | T068 | | | |
| T009 | | T024 | | T039 | | T054 | | T069 | | | |
| T010 | 98100031806542 | T025 | | T040 | | T055 | | T070 | | | |
| T011 | | T026 | | T041 | | T056 | | T071 | | | |
| T012 | | T027 | | T042 | USD | T057 | | T072 | | | |

- T001 (Record Type) – The value '04' identifies an international payment. If field T003 (Template Reference) had also been populated then this would have become an international payment from an existing international payment template.
- T007 (Destination Country) – The value 'US' is the ISO country code for the United States of America.
- T008 (Priority) – The value 'N' identifies this as a normal or standard priority payment
- T010 (Debit Account Identifier) – The value '98100031806542' is a UK Sterling account with sort code 98-10-00 and account number 31806542. No dashes or spaces are required when quoting the sort code, and no spaces are required between the sort code and the account number. The debit account must be a valid account as registered to that customer in Bankline. Note that the Debit account Identifier can also be supplied in IBAN format.
- T013 (Payment Currency) – The value USD is the ISO currency code for US Dollars.
- T014 (Payment Amount) – No leading spaces are required when quoting the payment amount, and the decimal point is necessary only where the payment amount requires it. The payment amount is in the currency quoted in field T013.
- T015 (Execution Date) – The value '01102006' equates to the 1st of October 2006.
- T022 (Account with Bank Identifier) – The value 'IRVTUS33NIRD' is the BIC for the Bank of New York in New York City.
- T028 (Beneficiary Account Number) – This is the Beneficiary Account Number held at the Account With Bank Identifier quoted in field T022.
- T030 (Beneficiary Name & Address Line number 1) – This is the name of the beneficiary customer linked to the Beneficiary Account Number quoted in field T028. For an international payment up to 3 additional lines of beneficiary address information may be quoted in fields T031, T032 and T033.
- T035 (FX Deal Reference) and T036 (FX Deal Exchange Rate) – The value 'L090630123456' in field T035 is the FX Deal Reference and the value '1.87' in field T036 is the FX rate associated with that deal reference.
- T042 (Credit Currency) – The value 'USD' is the ISO currency code for US Dollars.

4.6 Standard domestic bulk list

This example shows how to format an import record for a new Bankline standard domestic bulk list with a single beneficiary, starting with the debit side –

```

,,,06,T,SALARY MTH END 01,N,,,,,98100031806542,,,,,,,,,,,,,PAYROLL,,,,,,,,,,,,,
    
```

This can be broken down to illustrate how each field tag on the import record has been populated.

| Field | Value | Field | Value | Field | Value | Field | Value | Field | Value | Field | Value |
|-------|-------------------|-------|-------|-------|---------|-------|-------|-------|-------|-------|-------|
| H001 | | T013 | | T028 | | T043 | | T058 | | T073 | |
| H002 | | T014 | | T029 | | T044 | | T059 | | T074 | |
| H003 | | T015 | | T030 | | T045 | | T060 | | T075 | |
| T001 | 06 | T016 | | T031 | | T046 | | T061 | | T076 | |
| T002 | T | T017 | | T032 | | T047 | | T062 | | T077 | |
| T003 | SALARY MTH END 01 | T018 | | T033 | | T048 | | T063 | | T078 | |
| T004 | N | T019 | | T034 | PAYROLL | T049 | | T064 | | T079 | |
| T005 | | T020 | | T035 | | T050 | | T065 | | T080 | |
| T006 | | T021 | | T036 | | T051 | | T066 | | T081 | |
| T007 | | T022 | | T037 | | T052 | | T067 | | T082 | |
| T008 | | T023 | | T038 | | T053 | | T068 | | | |
| T009 | | T024 | | T039 | | T054 | | T069 | | | |
| T010 | 98100031806542 | T025 | | T040 | | T055 | | T070 | | | |
| T011 | | T026 | | T041 | | T056 | | T071 | | | |
| T012 | | T027 | | T042 | | T057 | | T072 | | | |

- T001 (Record Type) and T002 (Template Indicator) – The value '06' in field T001 identifies the payment type as, 'bulk list debit', and the value 'T' in field T002 indicates that the import is for a 'bulk list' (not a payment from a bulk list).
- T003 (Template Reference) – The value 'SALARY MTH END 01' is how the bulk list will be known in Bankline.
- T008 (Priority) – This field is used to differentiate standard domestic bulk lists from IAT bulk lists. In this case, the field has been left blank. When left blank, this value will always be defaulted to a value of 'N' for standard domestic.
- T010 (Debit Account Identifier) – The value '98100031806542' is a UK Sterling account with sort code 98-10-00 and account number 31806542. No dashes or spaces are required when quoting the sort code, and no spaces are required between the sort code and the account number. The debit account must be a valid account as registered to that customer in Bankline.
- T034 (Beneficiary Reference) – This is the reference that will be advised to the beneficiary customer and as such should be meaningful to the beneficiary, such as a payroll reference. Note that if an individual beneficiary is given their own reference (as specified on the standard domestic bulk list credit) then that will override any reference supplied here for that individual beneficiary.

The second part is the credit side, in this example for a single beneficiary.

When importing a standard domestic bulk list debit one or more consecutive standard domestic bulk list credits must be imported at the same time. This is because each standard domestic bulk list must have at least one beneficiary.

,,,07,,,1887,,,,,,,,,,,,,981000,,,,,31803654,,MR JOHN SMITH,,,PAYROLL 01,,,

This can be broken down to illustrate how each field tag on the import record has been populated.

| Field | Value | Field | Value | Field | Value | Field | Value | Field | Value | Field | Value |
|-------|-------|-------|--------|-------|---------------|-------|-------|-------|-------|-------|-------|
| H001 | | T013 | | T028 | 31803654 | T043 | | T058 | | T073 | |
| H002 | | T014 | | T029 | | T044 | | T059 | | T074 | |
| H003 | | T015 | | T030 | MR JOHN SMITH | T045 | | T060 | | T075 | |
| T001 | 07 | T016 | | T031 | | T046 | | T061 | | T076 | |
| T002 | | T017 | | T032 | | T047 | | T062 | | T077 | |
| T003 | | T018 | | T033 | | T048 | | T063 | | T078 | |
| T004 | | T019 | | T034 | PAYROLL 01 | T049 | | T064 | | T079 | |
| T005 | 1887 | T020 | | T035 | | T050 | | T065 | | T080 | |
| T006 | | T021 | | T036 | | T051 | | T066 | | T081 | |
| T007 | | T022 | 981000 | T037 | | T052 | | T067 | | T082 | |
| T008 | | T023 | | T038 | | T053 | | T068 | | | |
| T009 | | T024 | | T039 | | T054 | | T069 | | | |
| T010 | | T025 | | T040 | | T055 | | T070 | | | |
| T011 | | T026 | | T041 | | T056 | | T071 | | | |
| T012 | | T027 | | T042 | | T057 | | T072 | | | |

- T001 (Record Type) – The value '07' identifies the payment type as a, 'bulk list credit', and as it is being imported straight after a bulk list debit it can be deduced that this is a bulk list credit.
- T005 (Beneficiary Identifier) – This should uniquely identify each beneficiary on the bulk list and so a unique identifier should be used such as staff payroll reference.
- T022 (Account with Bank Identifier) – The value '981000' is the UK Sterling sort code 98-10-00.
- T028 (Beneficiary Account Number) – This is the Beneficiary Account Number held at the Account With Bank Identifier quoted in field T022.
- T030 (Beneficiary Name & Address Line number 1) – This is the name of the beneficiary customer linked to the Beneficiary Account Number quoted in field T028.
- T034 (Beneficiary Reference) – Although not a mandatory field, this is the individual reference that will be advised to the beneficiary customer (if that provided on the standard domestic bulk list debit is not to be used) and as such should be meaningful to the beneficiary, such as a payroll reference.

4.7 Standard domestic bulk payment

This example shows how to format an import record for a standard domestic bulk list payment with a single beneficiary. The first part is the debit payment –

,,,06,,SALARY MTH END 01,,,,,,,,98100031806542,,,,,,,,01102006,,,,,,,,,,,,,,PAYROLL,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,

This can be broken down to illustrate how each field tag on the import record has been populated.

| Field | Value | Field | Value | Field | Value | Field | Value | Field | Value | Field | Value |
|-------|-------------------|-------|----------|-------|---------|-------|-------|-------|-------|-------|-------|
| H001 | | T013 | | T028 | | T043 | | T058 | | T073 | |
| H002 | | T014 | | T029 | | T044 | | T059 | | T074 | |
| H003 | | T015 | | T030 | | T045 | | T060 | | T075 | |
| T001 | 06 | T016 | 01102006 | T031 | | T046 | | T061 | | T076 | |
| T002 | | T017 | | T032 | | T047 | | T062 | | T077 | |
| T003 | SALARY MTH END 01 | T018 | | T033 | | T048 | | T063 | | T078 | |
| T004 | | T019 | | T034 | PAYROLL | T049 | | T064 | | T079 | |
| T005 | | T020 | | T035 | | T050 | | T065 | | T080 | |
| T006 | | T021 | | T036 | | T051 | | T066 | | T081 | |
| T007 | | T022 | | T037 | | T052 | | T067 | | T082 | |
| T008 | | T023 | | T038 | | T053 | | T068 | | | |
| T009 | | T024 | | T039 | | T054 | | T069 | | | |
| T010 | 98100031806542 | T025 | | T040 | | T055 | | T070 | | | |
| T011 | | T026 | | T041 | | T056 | | T071 | | | |
| T012 | | T027 | | T042 | | T057 | | T072 | | | |

- T001 (Record Type) and T002 (Template Indicator) – The value '06' in field T001 identifies the payment type as, 'bulk list debit', and a value has not been populated in field T002. This means that the import is for a payment from a bulk list.
- T003 (Template Reference) – The value 'SALARY MTH END 01' identifies the bulk list from which the standard domestic bulk payment will be made from.
- T008 (Priority) – This field is used to differentiate standard domestic bulk payments from bulk Inter Account Transfers. In this case, the field has been left blank. When left blank, this value will always be defaulted to a value of 'N' for 'standard domestic'.
- T010 (Debit Account Identifier) – The value '98100031806542' is a UK Sterling account with sort code 98-10-00 and account number 31806542. No dashes or spaces are required when quoting the sort code, and no spaces are required between the sort code and the account number. The debit account must be a valid account as registered to that customer in Bankline.
- T016 (Date Payment to Arrive/Credit Date) – The value '01102006' equates to the 1st of October 2006.
- T034 (Beneficiary Reference) – This is the reference that will be advised to the beneficiary customer and as such should be meaningful to the beneficiary, such as a payroll reference. Note that if an individual beneficiary is given their own reference (as specified on the standard domestic bulk payment credit) then that will override any reference supplied here.

- T001 (Record Type) – The value '07' identifies the payment type as 'bulk list credit', and as it is being imported straight after a bulk list debit payment it can be deduced that this is a bulk list credit payment.
- T005 (Beneficiary Identifier) – This should uniquely identify each beneficiary on the bulk list and so a unique identifier should be used such as staff payroll reference.
- T013 (Payment Currency) – This will always be 'GBP' for a standard domestic bulk payment.
- T014 (Payment Amount) – No leading spaces are required when quoting the payment amount and the decimal point is necessary only where the amount requires it. The payment amount is in the currency quoted in field T013.
- T022 (Account with Bank Identifier) – The value '981000' is the UK Sterling sort code 98-10-00.
- T028 (Beneficiary Account Number) – This is the Beneficiary Account Number held at the Account With Bank Identifier quoted in field T022.
- T030 (Beneficiary Name & Address Line number 1) – This is the name of the beneficiary customer linked to the Beneficiary Account Number quoted in field T028.
- T034 (Beneficiary Reference) – Although not a mandatory field, this is the individual reference that will be advised to the beneficiary customer (if that provided on the standard domestic bulk list payment debit is not to be used) and as such should be meaningful to the beneficiary, such as a payroll reference.

4.8 Inter Account Transfer (IAT) bulk list

This example shows how to format an import record for a new Bankline Inter Account Transfer bulk list with a single credit account, starting with the debit side –

```
,,,06,T,LUMP SUM DISTRIB 1,N,,,,U,,98100031806542,,,,,,,,,,,,,NARRATIVE 1,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
```

This can be broken down to illustrate how each field tag on the import record has been populated.

| Field | Value | Field | Value | Field | Value | Field | Value | Field | Value | Field | Value |
|-------|--------------------|-------|-------|-------|-------------|-------|-------|-------|-------|-------|-------|
| H001 | | T013 | | T028 | | T043 | | T058 | | T073 | |
| H002 | | T014 | | T029 | | T044 | | T059 | | T074 | |
| H003 | | T015 | | T030 | | T045 | | T060 | | T075 | |
| T001 | 06 | T016 | | T031 | | T046 | | T061 | | T076 | |
| T002 | T | T017 | | T032 | | T047 | | T062 | | T077 | |
| T003 | LUMP SUM DISTRIB 1 | T018 | | T033 | | T048 | | T063 | | T078 | |
| T004 | N | T019 | | T034 | NARRATIVE 1 | T049 | | T064 | | T079 | |
| T005 | | T020 | | T035 | | T050 | | T065 | | T080 | |
| T006 | | T021 | | T036 | | T051 | | T066 | | T081 | |
| T007 | | T022 | | T037 | | T052 | | T067 | | T082 | |
| T008 | U | T023 | | T038 | | T053 | | T068 | | | |
| T009 | | T024 | | T039 | | T054 | | T069 | | | |
| T010 | 98100031806542 | T025 | | T040 | | T055 | | T070 | | | |
| T011 | | T026 | | T041 | | T056 | | T071 | | | |
| T012 | | T027 | | T042 | | T057 | | T072 | | | |

- T001 (Record Type) and T002 (Template Indicator) – The value '06' in field T001 identifies the payment type as, 'bulk list debit', and the value 'T' in field T002 indicates that the import is for a 'bulk list' (not a payment from a bulk list).
- T003 (Template Reference) – The value 'LUMP SUM DISTRIB 1' is how the Inter Account Transfer bulk list will be known in Bankline.
- T004 (Confidential Indicator) – The value 'N' identifies this bulk list as 'not confidential'.
- T008 (Priority) – The value 'U' is used as a marker to identify the bulk list as an IAT bulk list. If this field were left blank, the default value would be 'N', and the bulk list could only be used for standard domestic bulk payments.
- T010 (Debit Account Identifier) – The value '98100031806542' is a UK Sterling account with sort code 98-10-00 and account number 31806542. No dashes or spaces are required when quoting the sort code, and no spaces are required between the sort code and the account number. The debit account must be a valid account as registered to that customer in Bankline.
- T034 (Beneficiary Reference) – The value 'Narrative 1' is the narrative that will be marked against each credit account included within the bulk Inter Account Transfer. Note that if an individual credit account is marked with a different narrative (as specified on the IAT bulk list credit), then that will override any narrative supplied here for that individual credit account. If this value is left blank, the narrative will be defaulted to the 'debit account name'.

- T001 (Record Type) – The value '07' identifies the payment type as a, 'bulk list credit', and as it is being imported straight after a bulk list debit it can be deduced that this is a bulk list credit.
- T022 (Account with Bank Identifier) – The value '981000' is the UK Sterling sort code 98-10-00.
- T028 (Beneficiary Account Number) – This is the Credit Account Number held at the Account With Bank Identifier quoted in field T022.
- T034 (Beneficiary Reference) – Although not a mandatory field, this is the individual 'narrative' that will be marked against the credit account (if that provided on the IAT bulk list debit is not to be used). In this case, a value of 'Narrative 2' will be used instead of 'Narrative 1' (previously specified on the IAT bulk list debit).

- T001 (Record Type) and T002 (Template Indicator) – The value '06' in field T001 identifies the payment type as, 'bulk list debit', and a value has not been populated in field T002. This means that the import is for a payment from a bulk list.
- T003 (Template Reference) – The value 'LUMP SUM DISTRIB 1' identifies the bulk list from which the bulk Inter Account Transfer will be made from.
- T008 (Priority) – This field does not need to be populated for the import of a bulk IAT. The type of bulk payment is known from the 'bulk list reference' populated in field T003 (Template Reference)
- T010 (Debit Account Identifier) – The value '98100031806542' is a UK Sterling account with sort code 98-10-00 and account number 31806542. No dashes or spaces are required when quoting the sort code, and no spaces are required between the sort code and the account number. The debit account must be a valid account as registered to that customer in Bankline.
- T015 (Execution Date) – The value '01102006' equates to the 1st of October 2008.
- T034 (Beneficiary Reference) – This field should not be populated on the debit side of a bulk Inter Account Transfer.

- T001 (Record Type) – The value '07' identifies the payment type as, 'bulk list credit', and as it is being imported straight after a bulk Inter Account Transfer debit, it can be deduced that this is a bulk Inter Account Transfer credit.
- T013 (Payment Currency) – This will always be 'GBP' for a bulk Inter Account Transfer.
- T014 (Payment Amount) – No leading spaces are required when quoting the payment amount and the decimal point is necessary only where the amount requires it. The payment amount is in the currency quoted in field T013.
- T022 (Account with Bank Identifier) – The value '981000' is the UK Sterling sort code 98-10-00.
- T028 (Beneficiary Account Number) – This is the Beneficiary Account Number held at the Account with Bank Identifier quoted in field T022.
- T034 (Beneficiary Reference) – Although not a mandatory field, this is the individual 'narrative' that will be marked against the credit account on the bulk Inter Account Transfer (if that provided on the IAT bulk list debit or credit is not to be used). In this case, a value of 'Narrative 3' will be used instead of 'Narrative 2' (previously specified on the IAT bulk list credit).

4.10 Ad Hoc domestic bulk payment

This example shows how to format an import record for a standard domestic Ad Hoc bulk payment with a single beneficiary. The first part is the debit payment –

```

,,,08,,,,PAYROLLSEP,,,,98100031806542,,,,,01102006,,,,,,,,,,,,,PAYROLL2,,,,,,,,,,,,,,,,,,,,,
    
```

This can be broken down to illustrate how each field tag on the import record has been populated.

| Field | Value | Field | Value | Field | Value | Field | Value | Field | Value | Field | Value |
|-------|----------------|-------|----------|-------|----------|-------|-------|-------|-------|-------|-------|
| H001 | | T013 | | T028 | | T043 | | T058 | | T073 | |
| H002 | | T014 | | T029 | | T044 | | T059 | | T074 | |
| H003 | | T015 | | T030 | | T045 | | T060 | | T075 | |
| T001 | 08 | T016 | 01102006 | T031 | | T046 | | T061 | | T076 | |

- T001 (Record Type) – The value '08' in field T001 identifies the payment type as, 'Ad Hoc bulk payment debit'. This means that the import is for a bulk payment without a corresponding bulk list already set up on Bankline.
- T004 (Confidential indicator) – This field is used to identify whether the bulk payment is to be marked as confidential. In this case, the field has been left blank. When left blank, this value will always be defaulted to a value of 'N' which means the bulk payment will not be confidential.
- T006 [Customer payment reference] – Identifies the payment as it will be known to the remitter. If left blank defaults to the first 18 characters of the import file name.
- T010 (Debit Account Identifier) – The value '98100031806542' is a UK Sterling account with sort code 98-10-00 and account number 31806542. No dashes or spaces are required when quoting the sort code, and no spaces are required between the sort code and the account number. The debit account must be a valid account as registered to that customer in Bankline.
- T016 (Date Payment to Arrive/Credit Date) – The value '01102006' equates to the 1st of October 2006.
- T034 (Beneficiary Reference) – This is the reference that will be advised to the beneficiary customer and as such should be meaningful to the beneficiary, such as a payroll reference. It is optional, but in this example has been populated. Note that if an individual beneficiary is given their own reference (as specified on the standard domestic bulk payment credit) then that will override any reference supplied here.

- T001 (Record Type) – The value '09' identifies the payment type as 'Ad Hoc bulk payment credit', and as it is being imported straight after an Ad Hoc bulk debit payment it can be deduced that this is a bulk credit payment.
- T013 (Payment Currency) – This will always be 'GBP' for a standard domestic bulk payment.
- T014 (Payment Amount) – No leading spaces are required when quoting the payment amount and the decimal point is necessary only where the amount requires it. The payment amount is in the currency quoted in field T013.
- T022 (Account with Bank Identifier) – The value '981000' is the UK Sterling sort code 98-10-00.
- T028 (Beneficiary Account Number) – This is the Beneficiary Account Number held at the Account With Bank Identifier quoted in field T022.
- T030 (Beneficiary Name & Address Line number 1) – This is the name of the beneficiary customer linked to the Beneficiary Account Number quoted in field T028.
- T034 (Beneficiary Reference) – Although not a mandatory field, this is the individual reference that will be advised to the beneficiary customer and as such should be meaningful to the beneficiary, such as a payroll reference. If left blank, field T034 defaults to the debit account name as held in Bankline for the Debit Account identifier (field T010).

5. Glossary of terms

We've used these terms and abbreviations throughout this document.

| Term/Abbreviation | Definition |
|---------------------|--|
| Ad Hoc Bulk Payment | This is a bulk payment made without a bulk list already set up on Bankline. |
| BIC | Bank Identification Code This is the structured code used by SWIFT to uniquely identify a financial institution, its country of operation, and its branches. |
| Bulk IAT | Bulk Inter Account Transfer A single debit, multiple credit Inter Account Transfer made from a bulk list. |
| Domestic | Domestic payments are those that are made to a beneficiary who is domiciled within the UK (or the Isle of Man, Jersey, Guernsey or Gibraltar). |
| Faster Payment | A near real time Sterling transfer between banks. A faster payment may be classed as an immediate payment, a future dated payment or standing order. |
| IAT | Inter Account Transfer A payment made by a customer from one of their own accounts to another of their accounts held with the same bank. |
| IAT bulk list | Inter Account Transfer bulk list A bulk list that is used to make single debit, multiple credit Inter Account Transfers. |
| NCC | National Clearing Code The standard identification code for a country, used to uniquely identify a bank, branch or other financial institution (e.g. a Sort Code in the UK or a Fedwire Number in the United States of America). |
| Sort Code | The UK's national clearing code used to uniquely label a bank, branch or other financial institution. The sort code is registered in the BACS industry database to show whether it is valid for use on standard domestic or urgent domestic (CHAPS) payments. |
| SWIFT | Society for Worldwide Interbank Financial Telecommunication SWIFT operate and regulate the secure network used to transmit many of the inter-bank electronic payment messages that will originate from Bankline. |
| SEPA | Single euro payment area. This comprises the member countries of the EU, plus Iceland, Liechtenstein, Monaco, Norway, and Switzerland. From 1 May 2016 the UK Crown Dependencies (Jersey, Guernsey and the Isle of Man) were also added. An international SEPA-routing payment is a payment to one of the above countries that is sent in euro as standard priority, with Charges Code (T012) left blank or set to 'SHA' , and does not make use of either an intermediary BIC (T043) or SWIFT code words (T048 to T067). |
